

Social Impact Cause Areas

- Arts and Culture
- Animal Rights & Welfare
- Restorative and Criminal Justice
- Disaster Response, Relief, and Recovery
- Diversity, Equity and Inclusion
- Economic Empowerment and Workforce Development
- Education
- Food and Hunger
- Housing and Homelessness
- Sustainability and Environment
- Human Rights
- Civic Engagement
- Public Health
- Science and Technology
- Poverty Alleviation

Social Impacts

- Increase appreciation and support for the arts
- Reduce criminal activity
- Reduce criminal recidivism
- Achieve financial stability
- Increase access to and acquire employment
- Promote economic growth
- Enhance community infrastructure
- Ensure STEM skills proficiency
- Increase access to quality education programs and services
- Improve academic achievement
- Reduce homelessness
- Increase amount and access to quality affordable housing
- Increase education, awareness and/or understanding of the risks/threat of climate change
- Reduce carbon impact
- Increase land protection and/or conservation
- Increase water protection and/or conservation
- Improve air quality
- Improve water quality
- Reduce hunger and malnutrition
- Increase access to nutritious food
- Increase access to drinkable/potable water
- Increase sustainable food systems
- Increase sustainable water systems
- Achieve equality/eliminate discrimination
- Increase active participation in society
- Increase peace through conflict resolution
- Reduce disease/improve health
- Increase access to quality, affordable healthcare and services

- Improve reproductive health
- Reduce risky and addictive behaviors
- Reduce trauma
- Protect and rescue animals
- Increase access to mental health services
- Advocate for/Promote Policy Change

Social Impact Audience + Demographics

- Seniors and Aging Populations
- Youth/Young People
- Indigenous Peoples
- Immigrants
- Migrants and Refugees
- People who identify as LGBTQ+
- People of Color
- Veterans
- Women and Girls
- People with Disabilities/Differently Abled
- People Experiencing Poverty
- People Experiencing Homelessness
- People Experiencing Obesity and/or Diabetes
- People Experiencing Hunger or Malnourishment
- People Experiencing Mental Illness
- People Experiencing Viruses and Diseases

Here's something summarised for who the SDGs impact :

The Sustainable Development Goals (SDGs) are designed to positively impact a wide range of demographics and communities around the world. Here's a breakdown of the demographics of people who benefit from the SDGs being addressed:

Children and Youth: SDGs address issues like quality education (Goal 4) and good health and well-being (Goal 3), benefiting children and young people by ensuring access to education, healthcare, and a healthy environment to grow up in.

Women and Girls: Goals such as gender equality (Goal 5) focus on empowering women and ensuring equal opportunities in various sectors, including education, employment, and decision-making processes.

Underprivileged and Marginalized Communities: SDGs emphasize reducing inequalities (Goal 10) and ending poverty (Goal 1), which benefit marginalized communities, including indigenous populations, refugees, and people living in slums, by promoting social and economic inclusion.

People in Developing Countries: Goals related to no hunger (Goal 2), clean water and sanitation (Goal 6), and affordable and clean energy (Goal 7) aim to improve living conditions in developing countries, ensuring access to basic necessities.

People in Urban and Rural Areas: Sustainable cities and communities (Goal 11) and life on land (Goal 15) address challenges faced by both urban and rural populations, promoting sustainable practices and environmental conservation.

Elderly Population: Goals like good health and well-being (Goal 3) and decent work and economic growth (Goal 8) ensure that older adults have access to healthcare and opportunities for decent work, contributing to their well-being.

Persons with Disabilities: SDGs focus on making cities inclusive, safe, and sustainable (Goal 11) and reducing inequalities (Goal 10), ensuring that persons with disabilities have equal access to public spaces, education, and employment opportunities.

Global Citizens: Climate action (Goal 13) and life below water (Goal 14) are vital for the health of the planet, benefiting all global citizens by addressing climate change and preserving marine ecosystems.

Workers and Laborers: Decent work and economic growth (Goal 8) promote fair employment, workers' rights, and economic stability, benefiting laborers and workers in various industries.

Consumers: Responsible consumption and production (Goal 12) promote sustainable lifestyles and responsible business practices, ensuring that consumers have access to safe and eco-friendly products.

It's important to note that the SDGs are interconnected, and progress in one goal often contributes to progress in others. By addressing these goals, the global community works towards creating a more equitable, just, and sustainable world for everyone.

Cause Areas	Impact
Arts and Culture	- Increase appreciation and support for the arts - Increase access to quality education programs and services - Increase active participation in society
Animal Rights & Welfare	- Protect and rescue animals - Increase land protection and/or conservation - Increase water protection an/or conservation - Advocate for/Promote Policy Change
Restorative and Criminal Justice	- Reduce criminal activity - Reduce criminal recidivism - Achieve equality/eliminate discrimination - Increase active participation in society

	- Reduce risky and addictive behaviors - Reduce trauma - Advocate for/Promote Policy Change
Disaster Response, Relief, and Recovery	- Enhance community infrastructure - Reduce homelessness - Reduce hunger and malnutrition - Increase access to quality, affordable healthcare and services - Reduce trauma - Protect and rescue animals - Increase peace through conflict resolution
Diversity, Equity and Inclusion	- Increase appreciation and support for the arts - Ensure STEM skills proficiency - Increase access to and acquire employment - Promote economic growth - Achieve equality/eliminate discrimination - Increase active participation in society - Advocate for/Promote Policy Change
Economic Empowerment and Workforce Development	- Achieve financial stability - Increase access to and acquire employment - Promote economic growth - Ensure STEM skills proficiency - Increase access to quality education programs and services
Education	- Ensure STEM skills proficiency - Increase access to quality education programs and services - Improve academic achievement - Advocate for/Promote Policy Change
Food and Hunger	- Reduce hunger and malnutrition - Increase access to nutritious food - Increase sustainable food systems
Housing and Homelessness	- Reduce homelessness - Increase amount and access to quality affordable housing - Advocate for/Promote Policy Change

Sustainability and Environment	- Increase education, awareness and/or understanding of the risks/threat of climate change - Reduce carbon impact - Increase land protection and/or conservation - Increase water protection an/or conservation - Improve air quality - Improve water quality - Advocate for/Promote Policy Change
Human Rights	- Achieve equality/eliminate discrimination - Increase peace through conflict resolution - Reduce trauma - Advocate for/Promote Policy Change
Civic Engagement	- Advocate for/Promote Policy Change - Increase peace through conflict resolution - Increase active participation in society
Public Health	- Reduce hunger and malnutrition - Increase access to nutritious food - Increase access to drinkable/potable water - Reduce disease/improve health - Increase access to quality, affordable healthcare and services - Improve reproductive health - Reduce risky and addictive behaviors - Increase access to mental health services - Advocate for/Promote Policy Change
Science and Technology	- Promote economic growth - Enhance community infrastructure - Ensure STEM skills proficiency - Increase active participation in society - Reduce disease/improve health
