

Setup local environment for watsonx mapping code

 PLT-8939: Setup local environment for watsonx mapping code DONE

Requirements

1. Python 3.10.2 - conda causes issues with compatibility for one of the dependencies; recommend fresh installing Python sans conda(if using latter)
2. virtualenv or venv

Setup

- Important that setup done using virtualenv to prevent conflict(s) with existing packages

1. create a virtualenv 'venv'/name_of_env_here'. To activate it:

- a. in venv/Scripts:

- i. If using windows run 'activate'

- ii. Linux/Macos: source it

2.

```
1 pip install -r requirements.txt
```

3. Run stage1_mapping.py

4. Tweak number of passages extracted in run_discovery.py to either the top 2 or 3(or more) based on requirement
